VALUGARDS LATEX GLOVES provide a snug, comfortable fit, improving dexterity and touch sensitivity. Recommended for delicate work, such as slicing or chopping.

NITRILE GLOVES are a great latex free alternative for jobs where a tight fitting durable glove with a great touch sensitivity is needed. The purple color allows identification if any piece is broken off during prep times.

POLY GLOVES are loose fit for easy on/off. Embossing creates tiny air pockets permitting air to circulate around the hand.

VALUGARDS VINYL tight fitting gloves are an economical alternative to latex that offers improved dexterity & touch sensitivity over looser fitting gloves.

World Centric plates are made from wheat straw, a leftover agricultural fiber and an annually renewable resource.

- Microwave and freezer safe - can be used for both hot and cold items
- Soak proof - *Though these compostable plates are soak proof, hot items will cause the plates to "perspire" and some condensation will form at the bottom.*
- No plastic or wax lining
- Suitable for hot foods up to 220°F
- Gluten-free. Wheatstraw is the remaining plant fiber after the grain (which stores the proteins & allergens) has been removed.

WHAT DO THE RECYCLING NUMBERS MEAN

The numbers shown inside the chasing arrows refer to different types of plastics used in making plastic products and containers. The numbering system is based on a voluntary plastic guide developed by the Society of The Plastics Industry, SPI. Presently, SPI is working to improve the numbering system to make it easier for you to know what to recycle.

PET (Polyethylene terephthalate)

PET is used in the production of soft drink bottles, peanut butter jars...

PET can be recycled into fiberfill for sleeping bags, carpet fibers, rope, pillows...

PP (Polypropylene)

PP is used in most yogurt containers, straws, pancake syrup bottles, bottle caps...

PP can be recycled into plastic lumber, car battery cases, manhole steps...

HDPE (High density polyethylene)

HDPE is found in milk jugs, butter tubs, detergent bottles, motor oil bottles...

HDPE can be recycled into flower pots, trash cans, traffic barrier cones, detergent bottles...

PS (Polystyrene)

PS is found in disposable hot cups, packaging materials (peanuts), and meat trays...

PS can be recycled into plastic lumber, cassette tape boxes, flower pots...

V (Polyvinyl chloride)

PVC is used in shampoo bottles, cooking oil bottles, fast food service items...

PVC can be recycled into drainage and irrigation pipes...

OTHER

This is usually a mixture of various plastics, like squeeze ketchup bottles, "microwaveable" dishes...

Other (number 7) is usually not recycled because it is a mixture of different types of plastics.

LDPE (Low density polyethylene)

LDPE is found in grocery bags, bread bags, shrink wrap, margarine tub tops...

LDPE can be recycled into new grocery bags...

RECYCLING RULES VARY FROM COUNTY TO COUNTY! Your local recycling program may be based on the number system or on how the plastic was made. Check with your local recycling program to find out which types of plastics are recyclable in your community. Please be sure to recycle only those plastics collected in your recycling program!
