

July 3, 2021

Dear Valued Customer,

Tyson Foods, Inc. is voluntarily recalling approximately 8.5 million pounds of frozen, fully cooked chicken. Tyson has been working closely with the U.S. Department of Agriculture on this recall, and while there is no conclusive evidence that the products were contaminated at the time of shipment, the voluntary recall is being initiated out of an abundance of caution.

The affected products were produced at one plant located in Dexter, Missouri, between December 26, 2020 and April 13, 2021, and distributed to foodservice and retail customers nationwide and Puerto Rico. They are being recalled as a precaution due to possible exposure to *Listeria monocytogenes*, a harmful bacteria.

The recall includes Tyson® branded frozen, fully cooked products as well as private label products made for customers. You may have received the affected products. Each package has the establishment code P-7089. View the full press release [here](#).

A Tyson Customer Service Associate (CSA) will contact you regarding product disposal and credit on all destroyed goods. To facilitate this credit, please complete and return the attached Tracker Form to your CSA.

Regards,

Jason Nichol
Chief Customer Officer

Tyson Foods, Inc.
